Web Seminar "Metalworking Fluids" on 5 - 6 December 2022

In a nutshell: For the first time, we are offering our well-established web-seminar "Metalworking Fluids " in English. It will take place on 5 and 6 December 2022, half-day each. In this compact Web Seminar, the most important aspects of metalworking fluids will be covered over two half days. This seminar is designed for both newcomers and experts. The speaker will be Prof. Dr. Joachim Schulz, who is valued in the industry.

Dear Ladies and Gentlemen,

we would like to inform you about our new web seminar "**Metalworking Fluids** ", which we will offer for the first time on **5 and 6 December 2022** (half-day each).

In the compact web seminar, the most important aspects of metalworking fluids are conveyed in a targeted manner, starting from an overview of the types of metalworking fluids, the metalworking processes as well as the selection, use and monitoring of metalworking fluids to disposal.

In order to maintain the participants' concentration despite the large amount of information, the seminar is divided into two half days. Participation can take place from the workplace as well as from the home office. This means that the training can be carried out effectively and at low cost without the need to travel.

Participants will receive a compact overview of the most important aspects of the special field of metalworking fluids and valuable information for their everyday work. In addition, you are welcome to bring in your practical questions.

The speaker at the seminar is Prof. Dr. Joachim Schulz, who has a recognised high-level of expertise in the field of metalworking fluids and extensive practical experience over many years.

Take advantage of this offer for qualified further training for your employees!

Schedule and contents of the Web Seminar "Metalworking Fluids":

Monday, 5th of December 2022 (afternoon)

- 13.00 - 13.15 Welcome, introduction, organisational matters
- 13.15 - 14.45 KSS introduction, metalworking fluids types, base oils and additives for cooling lubricants
- 14.45 - 15.00 Break
- 15.00 - 16.30 Overview of metalworking processes, forming and machining processes

Tuesday, 6th of December 2022 (morning)

- 9.00 - 10.30 Selection and use of metalworking fluids, preparation and preservation of water-mixed coolants
- 10.30 - 10.45 Break
- 10.45 - 12.00 Monitoring and maintenance of metalworking fluids, occupational health and safety and environmental protection, disposal of coolants
- 12.00 - 12.30 Questions from the participants

Participants are welcome to ask their questions via chat or verbally during the presentations, which the speaker will be happy to answer. In addition, there will be enough time at the end of the seminar for participants to ask practical questions. Questions can also be sent to the organiser in advance and then be answered during the seminar by Prof. Dr. Schulz.

The seminar presentations will be sent to the registered persons or their companies digital before the seminar. This allows participants to make written notes in the documents during the web seminar. These handouts are only for the personal usage of the participants and may not be copied and distributed to others.

The seminar will only be from a minimum number of participants. The number of participants is also limited in order to be able to respond to specific questions and to have useful discussions.

We therefore recommend early registration if you are interested!

Participation fee including online access and conference documents (will be sent in due time):

UNITI/VSI members	€ 395,-- + 19% VAT.
Non-members	€ 495,-- + 19% VAT

Registration (see registration form attached, please send directly to UNITI):

Registration deadline:	November 18, 2022
Cancellation deadline:	November 18, 2022

We will send the programme of the seminar and the dial-in data for the online seminar to the registered persons before the seminar.

Participants will receive a certificate of attendance after the seminar.

If you have any questions, please do not hesitate to contact Mr René Löser at Tel.: +49 30 755 414-400 or by e-mail at loeser@uniti.de.

With kind regards

Dipl.-Ing. Edwin Leber
